About SeeTrue

Largest **AI-based** Security Screening Software Company

Founded in 2018
Field-proven since 2019

Over 3M **threats detected** and stopped in 2024

Machine Agnostic, X-ray & CT

OEM **partnerships**

Global presence NY, London, TLV(R&D) and Amsterdam.

Our Offering

Aviation

	X-ray	CT
Passenger Checkpoint & HBS	✓	✓
Aviation Workers Screening	✓	✓
Loading Docks	✓	✓
Airport Cargo	✓	✓

Urban Security

Customs and Parcels

Solutions

- AI Open Platform
- Centralized Threat Management
- Process Analytics
- Performance Management

Product Video in Our Lab

Automatic Threat Detection Expertise

Firearms & Explosives

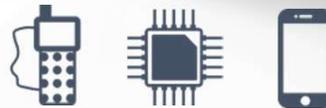

Knives & Sharps

Drugs, Tobacco, Currency & Gold

Electronics

The Need for an AI Security Solution

Automation of Detection

AI solution can automatically detect security threats that may be overlooked by traditional methods, enhancing safety.

Speed and Efficiency

AI streamlines the screening process, minimizing wait times and optimizing resource allocation.

Consistency and Accuracy

AI algorithms enhance security by maintaining accuracy and consistent results, reducing human error.

Benefits of AI- based Security Screening

+90%

Accuracy
in detection

+30%

Increase in throughput

- Lower False Alarm
- Faster Detection

+20%

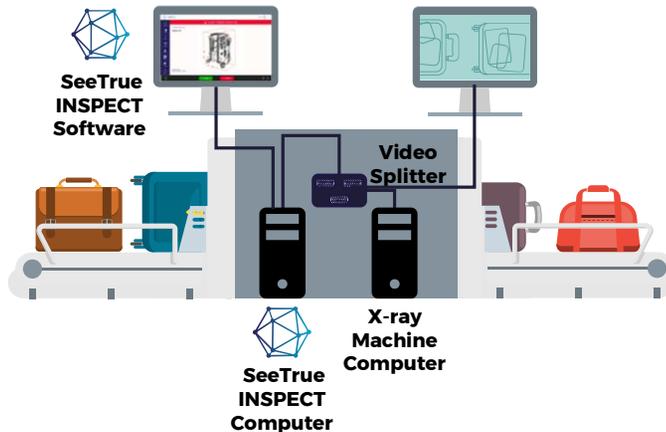

Security costs savings

Connectivity to X-ray & CT Scanners

SeeTrue for X-ray

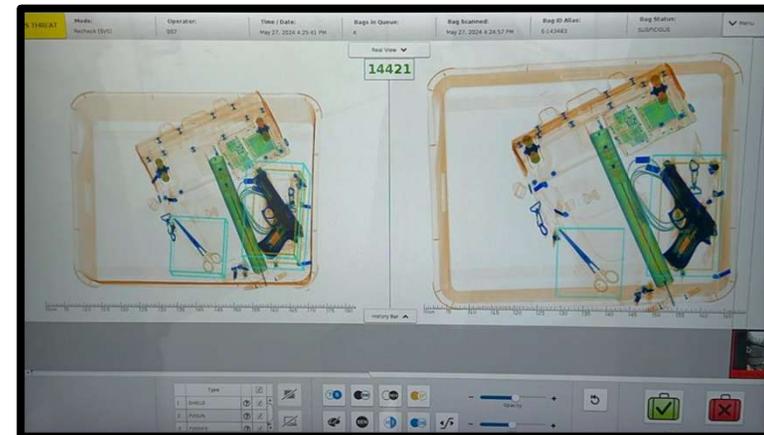

- **Connection:** Utilizes a standard video splitter to connect to the scanner's monitor cable.
- **Detection Results:** Displayed seamlessly within the SeeTrue Application.
- **Compatibility:** Fully integrated with any X-ray machine, including single-view, dual-view, and AT systems.

With
SeeTrue

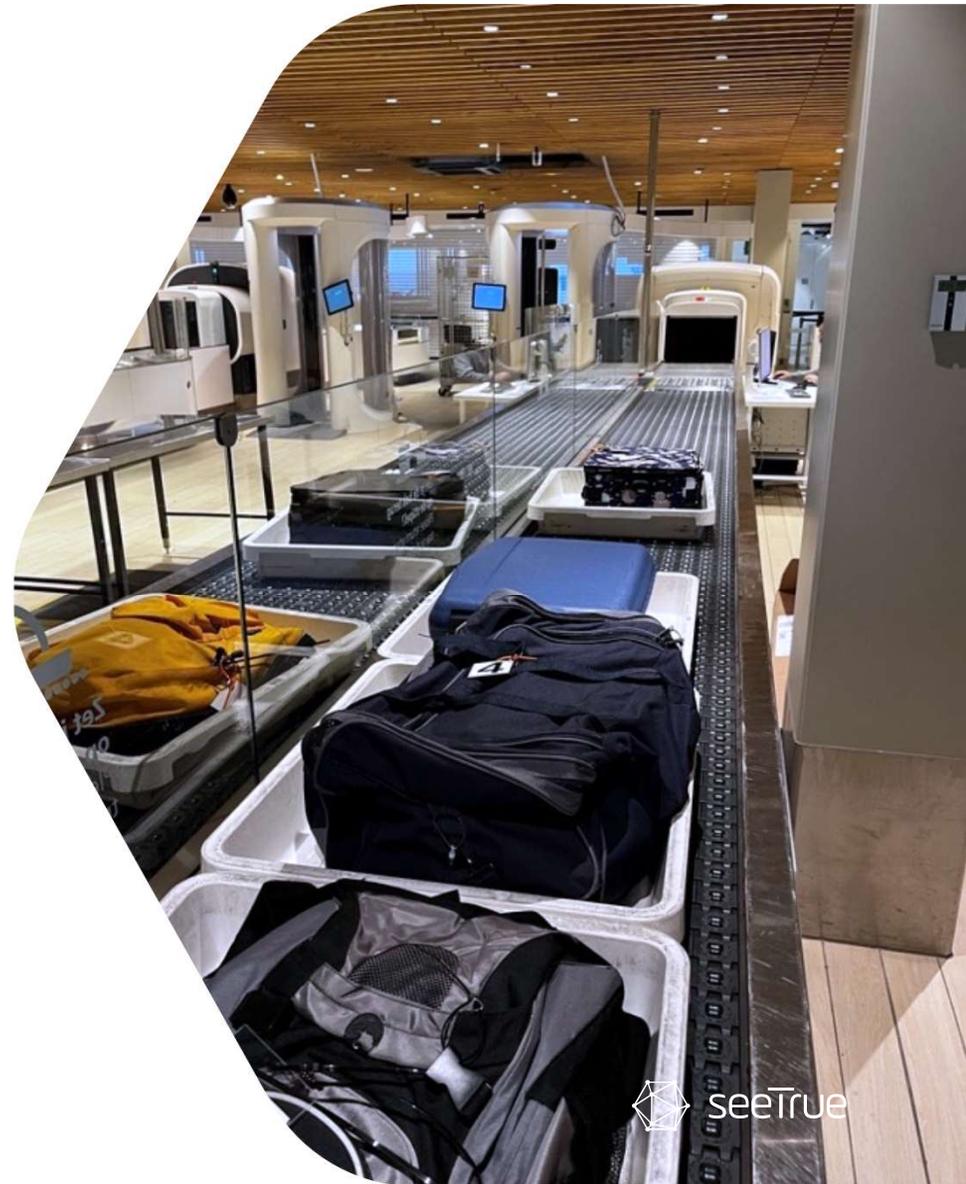

SeeTrue for CT

- **Connection:** Utilizes a DICOS-based API for seamless integration.
- **Detection Results:** Fully integrated with the CT scanner's native application.
- **Compatibility:** Works with Smiths CTiX, Analogic ConneCT, Leidos ClearScan™, and IDSS Detect1000™.
